Remove the old knob and felt washers. Note the supplied new knob has a slightly smaller diameter than the original knob. The felt washers supplied with the knob are the correct diameter for the new knob.

Before mounting the knob place the felt friction washer over the VFO B shaft. Mount the knob on the VFO B encoder shaft to the right (under the pushbutton switches) as shown in Figure 1. Before tightening the set screws, adjust the position of the knob against the felt washer to produce the desired amount of drag for smooth movement without the knob turning too freely. A second felt washer may be needed to obtain the desired amount of drag.
