

# KXV3B INTERFACE OPTION MANUAL ERRATA

Rev. C-1, June 8, 2015

**MAKE THESE CHANGES TO YOUR  
MANUAL BEFORE YOU BEGIN ASSEMBLY.**

**1. Page 16: Third checkbox step beginning with "Refer to your Owner's Manual..."**

Replace the step with the following two steps:

- Check the level of firmware installed in your K3 as described in your K3 Owner's manual. You must have firmware level 05.26 or higher installed before proceeding.
- Enable and test the KXV3B as follows:
  - Hold **CONFIG** to enter the configuration menu.
  - Turn VFO B to display *KXV3* on the LCD. If the display reads *KXV3B* and *nor*, the interface is installed and enabled. If the display reads just *KXV3* (no B), turn the VFO A as needed to display *nor*.
  - Tap **9** on the numeric keypad. The B should appear so the display reads *KXV3B*.
  - Exit the menu.
  - Tap **POWER** to cycle the power off, then on again.
